

MINING PRODUCTS OVERVIEW

Mining Products & Applications

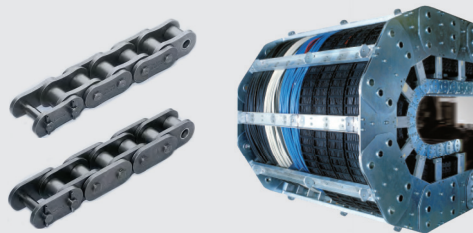

SHUTTLE CAR CHAINS

ROTARY BREAKER CHAIN & SPROCKETS

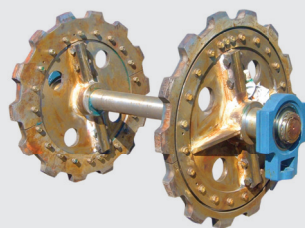

DRILL RIG CHAIN / CABLE CARRIER

CONTINUOUS MINER CHAIN

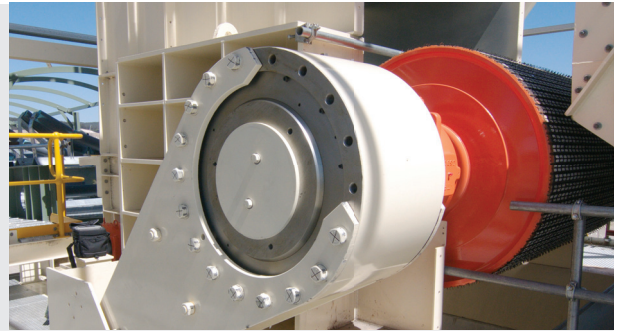

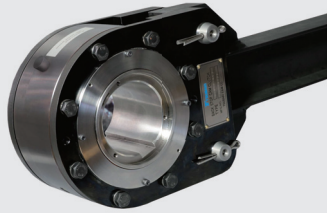

SPROCKETS & POWER LOCKS

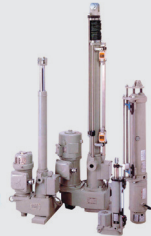

Mining Products & Applications

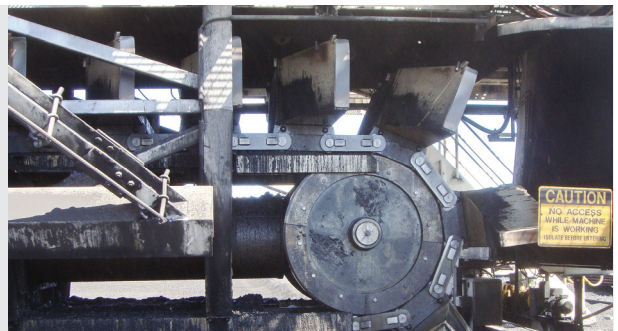

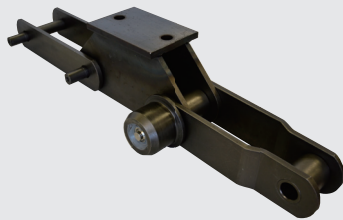

CAM CLUTCH / BACKSTOPS

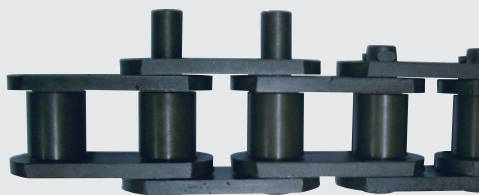

POWER CYLINDER / LINEAR ACTUATOR

RECLAIMER CHAIN

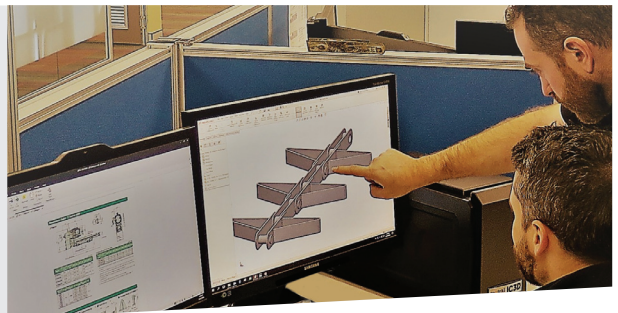

FEEDER BREAKER CHAIN

ENGINEERED SERVICES

At Tsubaki Australia, we support what we sell. This means that we are productive. Tsubaki's technical engineering staff offer on-site inspections and will recommend the best solution for your application. We can also tailor our in-house training workshops to your individual needs.

Evolving beyond a world class manufacturer... a solutions provider...

Mining with Tsubaki

The Tsubaki Group is the leading manufacturer of mining chains, cam clutches and power cylinders used in underground and above ground mines, preparation plants, power stations and port facility applications. We currently manufacture many different sizes of mining chains for several major OEMs. This relationship enables us to design upgrades for the chain in mining equipment to meet the ever-changing needs of the industry.

Tsubaki use alloy-grade steels, heat-treated to precise specifications and assembled with the heavy press-fits required to withstand the punishment of today's more powerful, high production mining equipment.

Our complete Mining range of chain includes Shuttle Car Chain, Feeder Breaker Chain, as well as various chains widely used in drill rigs, rotary breakers, reclaimers, face/roof drilling, continuous miners, prep plants, roof support machines, and continuous haulage systems.

To better service your industry, nearly all our mining related chains are in-stock and ready for immediate shipment.

The Tsubaki Group is also proud to provide a wide variety of in-house designed sprockets, which are required in all chain applications, as well as other related products such as cam clutches, power cylinders and Power Locks etc.

Furthermore, as the Tsubaki Group prides itself on its ability to answer customers' demanding needs through innovative customization of its products, we can manufacture made-to-order chains and attachment configurations, sprockets, etc., for your individual requirements.

Driving the World... and the future
