- ▶ Baggage Handling
- ▶ Packaging
- ▶ Brick
- ▶ Electrical

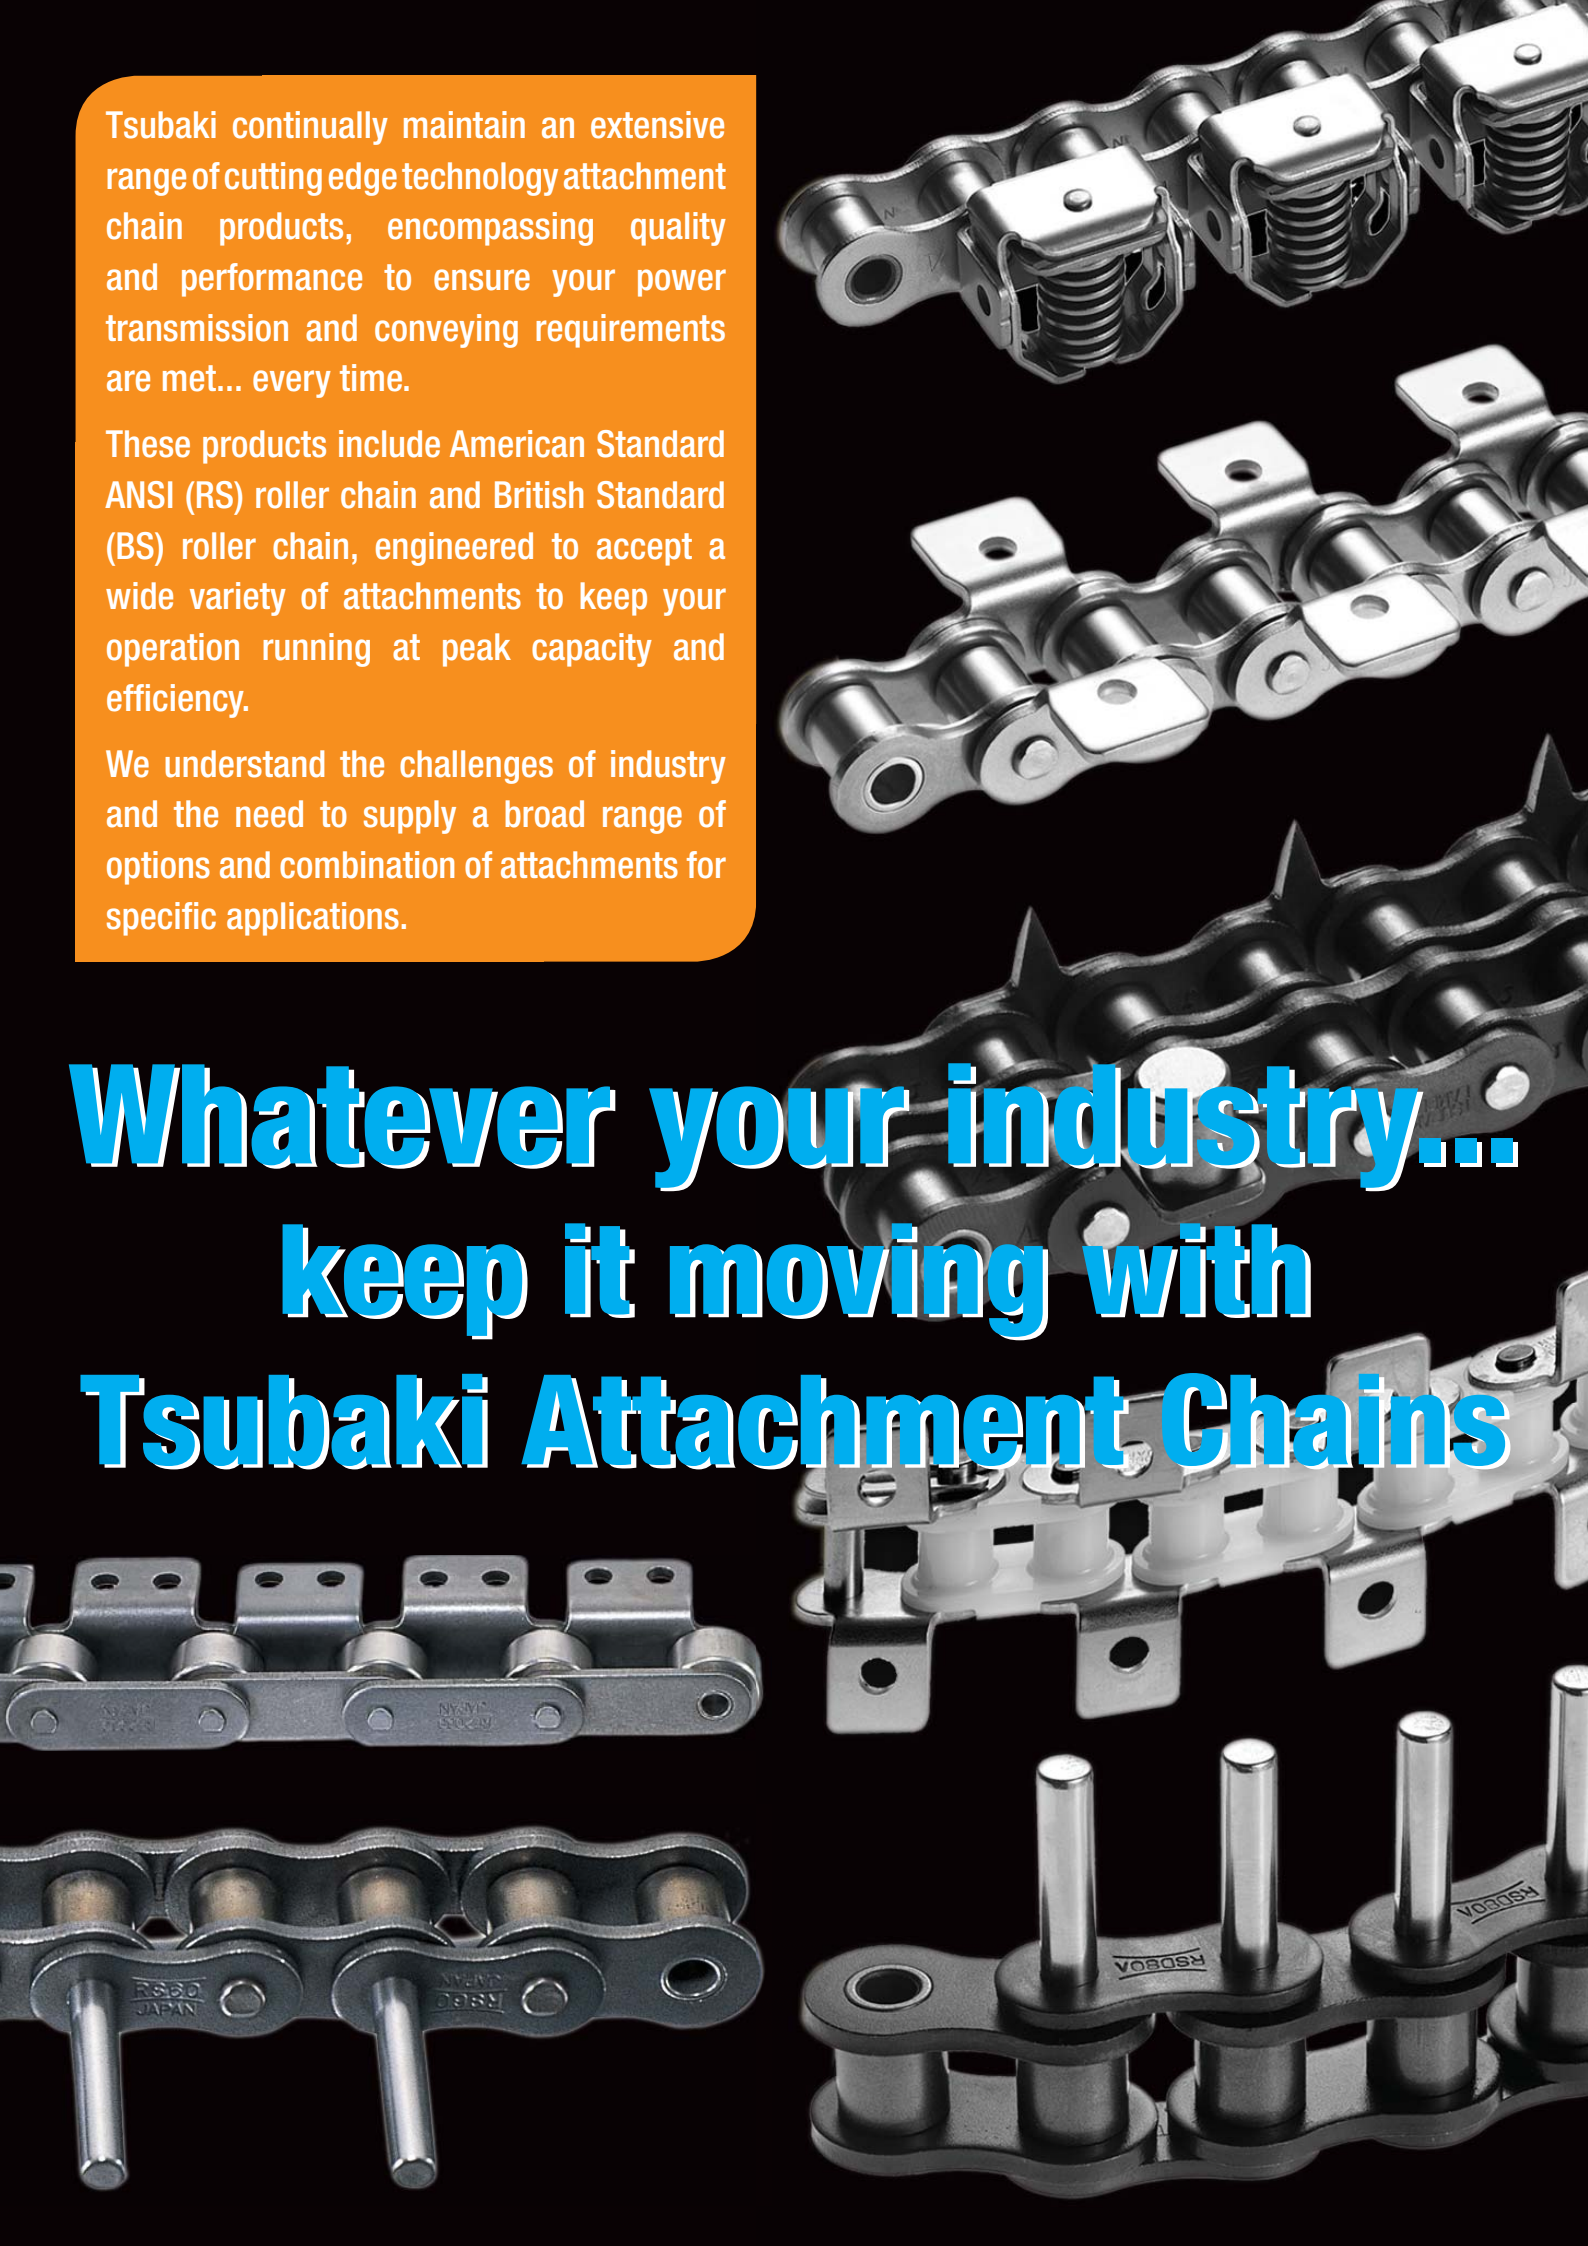

Tsubaki continually maintain an extensive range of cutting edge technology attachment chain products, encompassing quality and performance to ensure your power transmission and conveying requirements are met... every time.

These products include American Standard ANSI (RS) roller chain and British Standard (BS) roller chain, engineered to accept a wide variety of attachments to keep your operation running at peak capacity and efficiency.

We understand the challenges of industry and the need to supply a broad range of options and combination of attachments for specific applications.

Whatever your industry... keep it moving with Tsubaki Attachment Chains

Tsubaki Offers The Complete Package

Product

Manufactured from the finest material available, attachment chains from Tsubaki are engineered to ensure reliable, long lasting performance.

Service

A national sales and service network of experienced personnel are able to meet your specific requirements without delay, **anywhere... anytime.**

Value

Maximise your investment and minimise your costs by obtaining the right advice for your attachment chain application / requirements, **first time ...every time.**

Local Assembly

In order to meet the demands of the Australian market, Tsubaki Australia has a state of the art assembly facility in Melbourne.

Using quality Tsubaki components we are able to meet delivery times that our customers have come to expect.

Tsubaki Australia stock an extensive range of ANSI/BS Roller, ANSI Double Pitch and MR Agricultural attachments and Extended Pins.

If you need a quality product and prompt delivery, please contact your local Tsubaki distributor for a quotation.

Standard Range

- BS/ANSI Roller
- Double Pitch

Speciality Products

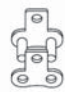

- NEP Corrosion Resistant
- Lambda Lube Free
- Nickel Plated
- Stainless Steel

Tsubaki attachment chain provides:

- **Widest Range Available**
- **Expert Advice**
- **Easy Selection**
- **Quick Delivery**
- **Outstanding Performance**

Standard Attachment Chains

Available Ex Stock

ANSI Standard 40,50,60,80	Bent one side		Bent both sides		Straight one side		Straight both sides		Extended pin	
	1 hole	2 holes	1 hole	2 holes	1 hole	2 holes	1 hole	2 holes	1 pin	2 pins
British Standard 08B, 10B, 12B, 16B Simplex Duplex Triplex	A1 	WA2 	K1 	WK2 	SA1 	WSA2 	SK1 	WSK2 	D1 	D3 
Double Pitch Chains RF2040 RF2050 RF2060 RF2080	A1 	A2 	K1 	K2 	SA1 	SA2 	SK1 	SK2 	D1 	D3 

Small & Large Roller Types Available

An extensive range of special attachments is also available to meet any application.

New Generation Speciality Materials for Attachment Chains

Corrosion Resistant Neptune (NEP) Chain

NEP (New Environmental Plating) Chain is a tough coated chain with optimized coatings applied to the parts prior to assembly. These special coatings have high corrosion resistance and protect the chain from corrosive environments.

Superior Corrosion Resistance

Features superior comprehensive anti-corrosion properties for outdoor use and other corrosive environments.

Note! Not recommended for applications subject to strong cleaning or water treatment chemicals.

Please contact Tsubaki Representative.

No Strength Reduction

Chain strength (part hardness) is unaffected thanks to low treatment temperatures. Thus, NEP Chains have the same tensile strength and allowable load as our standard Roller Chains.

Long Life without Lubrication

Lambda lube free chain is ideal for environments where chain lubrication is difficult, impossible or undesirable. Advanced lube free performance is delivered through a combination of superior parts including high specification oil impregnated sintered bushes.

Cleaner Work Environment

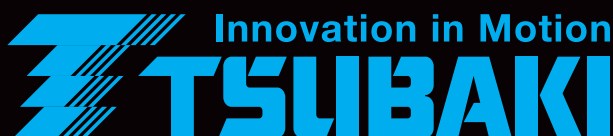

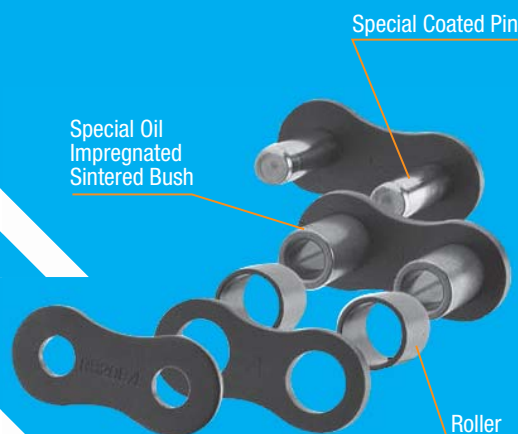

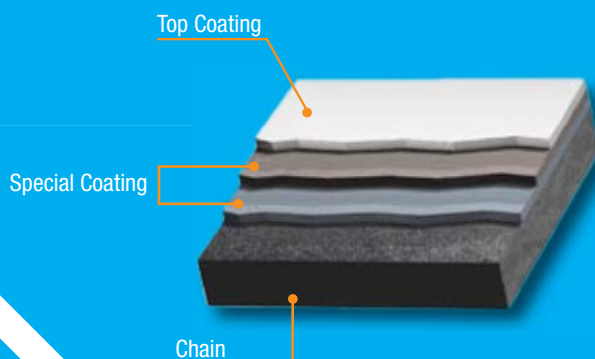

Machine and conveyed products do not become dirty from lubricating oil.

Reduced Maintenance

No lubrication, longer service life along with fewer chain take-ups and machine positioning adjustments.

Cost Reduction

Maintenance cost down + Working ratio up = Overall Cost Reduction
