

PERFORMANCE THROUGH INNOVATION

CHAINS

ANSI ROLLER CHAIN

Tsubaki, the world's largest and most advanced roller chain manufacturer has released the new 100th Anniversary Model G8 Series. The G8 series includes:

- Lambda - Better wear life and H1 food grade lubricant
- Neptune - Better corrosion and chemical resistance
- Heavy Duty Super/Super-H - Better fatigue strength
- Heavy Duty RS-HT - Better wear life

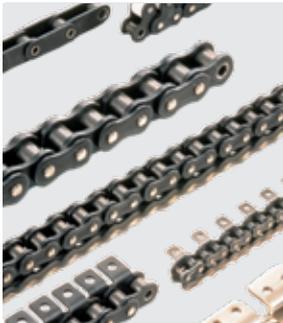

BS ROLLER CHAIN

The BS Roller Chain employs an innovative "LUBE GROOVE" bushing system technology to greatly improve the operating performance of the roller chain to a staggering 100% increase in wear life over chains of previous generations.

LAMBDA LUBE FREE CHAINS

Lambda Chain has gained an outstanding reputation in a variety of industries & applications. It is capable of meeting a wide range of customer needs for a long life in a lubrication-free environment, resulting in a reduction in overall long term costs.

ATTACHMENT CHAIN

Now, with greatly increased component stocks and expanded assembly facilities, Tsubaki Australia is able to meet your specific attachment chain requirements without delay, anywhere ... anytime.

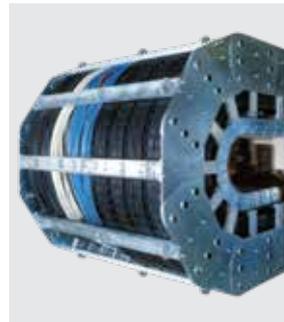

SPROCKETS

Standard range of pilot bore and taper lock sprockets with induction hardened teeth. Made to Order sprockets also available. Options include SMART TOOTH wear indicators to accurately determine tooth condition and ensures replacement before causing chain damage.

WELDED CHAIN

Tsubaki Welded Steel Mill and Drag Chains are designed and manufactured to provide precision, strength, impact resistance and wear resistance.

KABELSCHLEPP CABLE CARRIERS

No matter what your application you can count on KabelSchlepp to have a cable and hose carrier solution to meet your requirements. From lightweight micro-sized mono cable carriers up to large super-duty steel chain designs, KabelSchlepp has the perfect solution for any application.

EARTHMOVING PRODUCTS

Tsubaki Australia stocks Ballantine elevating scraper and trencher chains, together with a large range of sprockets, bolt kits, idlers and other related products to suit all makes and models.

CONVEYOR CHAIN

Tsubaki's metric and imperial conveyor chains are available in many combinations of steel materials and specifications of component parts. Tsubaki conveyor chains are manufactured to the highest quality based on our continually expanding production technologies and capabilities. This high quality gives longer life and reduced maintenance costs.

POWER TRANSMISSION

CAM CLUTCH

In backstop applications, the clutches are used to prevent reverse rotation of drive shafts, which may cause damage to machinery and other expensive equipment.

POWER CYLINDER

For applications requiring push-pull movement, the Tsubaki Power Cylinder is the complete self contained answer, ideal for remote control operations and integration with your computer controlled systems.

LINIPOWER JACK

Is the result of Tsubaki's cutting-edge technology acquired through years of experience as the leading manufacturer of our power cylinders electromechanical actuators. This strong base of design and engineering principals allows you, the user, to benefit from reliability, consistency and durability of performance.

TORQUE LIMITER

Provides simple, cost effective overload protection by slipping when the torque demand exceeds a preset value. No resetting is required.

POWER LOCKS

Eliminate backlash damage to keyways from heavy loads. End your high machining expenses for long shaft keyways, splined shafts, threads, grooves and steps. Erase the headaches of shrink and press fits.

ROLLER CHAIN COUPLING

Commonly used in slow speed high torque applications Tsubaki's specially formed and hardened teeth ensure evenly apportioned torque and a long trouble free service life.

SHOCK RELAY

By sensing electric motor overload and instantly shutting down your equipment. Tsubaki's Shock Relay protects expensive drive components and is ready for re-setting once the problem is removed.

ZIP CHAIN LIFTER

High-speed lifting. ZIP CHAIN is a unique chain that utilises Tsubaki's chain technology to allow for applications involving pushing and pulling. Without the need for hydraulics or pneumatics, ZIP CHAIN offers a clean working environment and up to 50% more energy efficient than hydraulic lifters.

Evolving beyond a world class manufacturer... a solutions provider...

For 30 Years Tsubaki Australia Pty Limited has responded to industry demands supplying superior quality products, engineering support and services to industrial customers throughout Australia and New Zealand.

As a subsidiary of The Tsubaki Group, Tsubaki Australia has kept abreast with advances in its product development capabilities and production technologies. The company offer world-class products to provide productivity improvements, cost/energy savings while supplying environmental footprint reductions to customers.

With over 60 locations throughout Australia and New Zealand (including Tsubaki branches and authorised distributors), you can rest assured Tsubaki will guarantee superior products, stock availability, engineering support and 24/7 service.

Driving the World... and the future
